Lavinet Recognized in APICTA 2012

Lavinet: An Innovative Multi-hop Wireless Network for Pervasive Wi-Fi Access led by [Prof Gary Chan](#) has won the Merit award in the Research and Development category of [Asia Pacific Information and Communications Technology Awards 2012](#) (APICTA 2012).

APICTA 2012 was held during 3–5 December 2012 in Brunei. It is a prestigious ICT award program for the Asia Pacific region. This year 157 entries from 16 participating economies (China, Australia, Singapore, and India included) were received for the event for Grand and Merit awards. The award in the Research and Development category recognizes the most outstanding ICT R&D project which caters the market needs.
